

PhishShield User Guide

How to Use PhishShield

1. Navigate to the PhishShield homepage.
2. In the input box, type or paste the full URL of the website you want to check.
3. Click the 'Check Safety' button.
4. The next page will show you the result of the analysis, indicating whether the site is likely safe or a phishing attempt.
5. The result page also shows a confidence score and the specific features of the URL that were analyzed.

Benefits of Using PhishShield

- **Real-time Protection:** Get an instant analysis of a URL before you visit it.
- **Increased Awareness:** Understand the characteristics of phishing URLs by seeing the feature analysis.
- **Peace of Mind:** Browse the web with more confidence, knowing you have a tool to check suspicious links.
- **Easy to Use:** A simple and intuitive interface makes it easy for anyone to check a URL.
